AIMD

1- Start by sending 1 MSS at a time (slow start) and grow exponentially

2- When threshold arrives, linearly increase the window size by adding 1 MSS

If

⤷ Drop or Time out occur
⤷ Calculate threshold at that point
⤷ Go to slow start and grow exponentially

if 3 Ack received

⤷ Calculate threshold at that po[...]
⤷ Reduce the window size equa[l]
   threshold
⤷ Grow linearly from that po[...]
